Professional Profile

Applied-AI and technical-operations candidate with experience across insurance, fire safety, construction and customer-facing work. Builds evidence-led AI evaluation systems, bounded agent workflows and practical verification controls. Strong communicator with a hands-on approach to problem solving, relationship building and accountable delivery.

Selected AI Engineering Work

Agent Reliability Arena

Designed a controlled evaluation system that separates an agent's completion claim from independently observable evidence. Built deterministic fixtures, replayable traces, fail-closed verification, bounded specialist orchestration and public release evidence. Current published results are software-fixture evidence, not a live-provider performance claim.

Agent Completion Verifier

Created a model-agnostic Python harness for checking whether an agent has sufficient evidence to claim that a task is complete. Includes explicit outcomes, deterministic benchmarks, sandboxed evaluation and documented limitations.

AI Agent Reliability Audit

Prepared a fixed-scope technical review for one tool-using workflow: workflow mapping, completion contracts, trace review, adversarial cases, independent postconditions, findings and a separate implementation plan.

Core Skills

AI evaluation	Agent architecture	Python systems
Adversarial testing	Evidence contracts	Release engineering
Technical operations	Client communication	Risk and compliance awareness

Professional Experience

Stanborough Underwriting - Insurance Industry | 2023-Present

- Developed professional communication, networking and relationship-management skills.
- Supported varied insurance-business activity and adapted to structured, detail-sensitive work.
- Built practical experience in problem solving, administration and business communication.

MJ Fire / FAFS - Fire Safety Technician | 2022

- Conducted water-pressure testing on dry risers in support of fire-safety compliance.
- Identified and reported potential faults and developed strong attention to technical detail.

Construction Projects - Labourer | 2021

- Supported renovation and building work in residential settings.
- Developed practical teamwork, reliability and hands-on problem solving.

Welling United Football Club - Ticketing Assistant | 2020-2021

- Managed ticket distribution and customer enquiries on match days.
- Delivered customer service in a fast-paced public environment.

Education and Professional Development

North Kent College

BTEC Diploma in Information Technology - Merit (completed 2022)

Stationers' Crown Woods Academy

GCSEs including English, Mathematics, Spanish, Drama, Religious Studies, Geography, Public Services, and Hospitality & Catering (completed 2020)

OpenAI Academy

Agents and Workflows; AI Foundations; Applied AI Foundations (completed 2026)

OpenLearn / The Open University

Business Models in Strategic Management; Financial Statement Analysis and Interpretation; Cost Accounting and Environmental Management Accounting; Risk Management; Working in Teams (completed 2025)

Focus Awards / PT Academy

Level 3 Diploma Practitioner in Personal Training (RQF), awarded March 2026

PT Academy

Level 3 Certificate in Assessing Vocational Achievement - assessment portfolio in progress; final award should not be presented as completed until confirmed

Additional Strengths

- Clear professional communication and client engagement
- Adaptability across technical, operational and customer-facing settings
- Evidence-led reasoning and willingness to label uncertainty
- Teamwork, discipline and practical responsibility
- Interest in AI systems, psychology, modelling and continuous learning

Public Evidence and Availability

Public repositories and verified portfolio evidence are available through github.com/Luca-1304. UK-based and open to relevant employment, contract and subcontract opportunities, including remote or hybrid work.
